

## Electronics Technician - Part Time Position

Gauzy is hiring! We are looking for a driven electronics technician to join our office in Vöhringen who will help Gauzy in the implementation of projects for the building/construction and automotive industries.

### who are we?

Gauzy's vision is to embed technology into raw material enabling it to be effective, efficient, applicative and smart. We are a vendor of material science, which develops, manufactures, and markets liquid crystal technology, which is currently embedded in glass. Our open concept office in Tel Aviv-Yafo is the Gauzy Headquarters, which hosts our head executives, R&D Department, and Production facility.

Gauzy GmbH in Germany is located in Vöhringen, our division is working on the R&D projects in the automotive industry. We are working together with all OEMs and 1st Tier suppliers worldwide on short- and long-term projects. Getting them ready for the next step in the car industry evolution.

### Responsibilities:

- Assistance in design and manufacturing of prototypes and demonstrators
- Construction and assembly of prototypes and demonstrators
- On-site support for installations and troubleshooting of problems
- Processing and preparing LC panels

### Desired Skills and Experience:

- Current enrollment in BSc Electrical Engineering or similar direction
- Experience in soldering and working with electronics measurement tools is highly desired
- Background with CAD design is highly desired
- Availability to work 20 hours per week on average
- Excellent hands-on skills and ability to do delicate work
- Self-driven and a team player
- English: good verbal and written – a must
